4 May 1987 **LOGGED**

ILLEGIB

MEMORANDUM FOR: Edward Maloney
Chief, Office of Information Technology

FROM: [REDACTED]
Associate Director, Development Programs Group, NPIC

STAT

SUBJECT: OIT - NPIC Working Relationship

1. With the advent of the Improved NPIC Data System and the ever increasing demand upon this Center to provide the Intelligence Community with accurate and timely information, NPIC's need for external communications is growing substantially. In order to meet these requirements, it is essential that a strong and direct working relationship exist between NPIC and OIT.

2. Currently, there does exist an agreement between NPIC's Development Program Group (DPG), and OIT's New Building Communications Program Division (NBCPD). This agreement is in the form of a jointly controlled appendix to DPG's External Communications Interface Document. It only addresses those areas of concern, however, arising from concurrent development efforts, not overall operational philosophy between our two organizations.

3. I believe it is in the best interest of both Offices to establish such a relationship, where NPIC and OIT can discuss mutual needs, resolve problems, and review roles and responsibilities. To this end, I have designated [REDACTED] Chief, System Engineering and Integration Division, DPG, as the point of contact for NPIC. He may be reached on [REDACTED] secure. Please have your appointed POC contact [REDACTED] at their earliest convenience so we may begin to realize the benefits of this association.
